

## WorldWinners is a next generation network reinventing socio-economic relations

The highly successful business model predisposes to scale of hundreds of millions users throughout all continents, which the desired software should handle gracefully.

## DataStork

- Is the sole IT partner responsible throughout the project lifecycle and stack from requirement analysis, IP, architectural analysis, implementation to deployment strategies, integration, and support.
- The rich eco-system of software modules, from payment integrations, online purchasing to cashier's and client's mobile apps are all delivered by DataStork
- Discounts and flexible payment schemes allowed WorldWinners to enjoy premium software development service adapted to the needs of a startup.

## Results

- Implemented beta of next generation social network in just 8 calendar months. The release is capable of handling up to 2 millions users.
- Provided international intellectual property protection
- Put in place a plan for scaling of up to tens of millions of users without business disruptions

## Project Details
